RECYCLABLE
PACKAGING

Innavisions

Dear Customer

We are a small team with over 80 years experience creating & delivering plastic and paperboard packaging to food customers in the UK. Innavisions provides standard off the shelf items as well as custom made packaging solutions.

Established for **20** years, we specialise in injection moulded plastic food packaging which is tamper evident or film sealable. ***Importantly all products are 100% recyclable.*** Service is the key to our philosophy and we are proud to have long and ongoing relationships with the majority of our customers.

How do we operate?

Innavisions are the exclusive UK Sales and Product Development partners to three leading European plastic packaging manufacturers.

These manufacturers' products combine to offer the widest range of standard injection moulded food packaging in the UK. Our UK Sales Office offers the customer a single point of contact for all communication, to ensure that you the customer gets the right product on time and in full. Shipping and invoicing is done directly from the manufacturer, so that we can offer the best possible prices. ***The best of both worlds.***

Innavisions also works closely with the manufacturers to offer new and innovative bespoke packaging solutions and our recent track record of doing this can be seen on the UK supermarket shelves.

In addition, Innavisions works with alternative approved European manufacturers to offer off the shelf solutions where the need arises.

Key Features

Below are listed some of the key features you may need to look for.

- Tamper Evident Design
- Film Sealed
- Recyclable
- Can be Filled Hot
- Suitable for Freezing
- Microwavable
- BRC/IOP Credited
- Lids Options Available
- Handle Options Available
- Transparent Grades
- Liquid Tight Lid

Need something bespoke?

Our innovative approach to packaging allows us to offer a completely bespoke solution whatever your requirements. We have years of experience working for some of the biggest names in the business to make the process as simple and effective as possible.

We have a thorough understanding of:

- **Needs and Trend in Consumer Behaviour**
- **Our customers food processing business**
- **The technology and capability of our manufacturers**

This creates innovative new products that meet the commercial requirements of the market.

Tamper Evident
Injection Moulded, PP

Innavisions offer the widest range of tamper evident style packs in the UK ranging in size from 30ml to 5000ml. Round packs make up the largest section of standard items, but in addition some interesting shapes are offered under a standard round lid. Adding to the options available are square, rectangular and oval ranges, some of which are unique in the market place.

Tamper evident style packs offer some great benefits to both the food packer and to the end consumer. They are easy and simple to close, either by machine or by hand, and have the ability to be re-closed by the consumer. The closure is liquid tight whilst the tamper evident rim protects the lid from being accidentally removed during transit. The PP material does offer the ability to hot fill and to microwave the pack, within limitations.

Nearly all the packs listed are held as stock items in transparent PP by the manufacturer. Customisation is available with colouring of the PP and with branding via In Mould Labelling (IML), which offers the highest quality of print in a permanent format. These are subject to minimum order sizes.

All packs are produced with fully direct food contact approved grades of PP in manufacturing facilities fully accredited to grade A level BRC/IOP.

With In Mould Labelling and Offset Print

Film Sealable
Injection Moulded, PP

The standard round diameters are well catered for with this range of high quality injection mould film sealable packs. Adding to this are ranges of square, rectangular and oval packs.

All packs can be easily sealed with standard sealing films. In fact these can also be sourced through Innavisions. The packs are offered with an over lid as an option, if so required. The PP material does offer the ability to hot fill and to microwave the pack, within limitations.

Nearly all the packs listed are held as stock items in transparent PP by the manufacturer. Customisation is available with colouring of the PP and with branding via In Mould Labelling (IML), which offers the highest quality of print in a permanent format. These are subject to minimum order sizes.

All packs are produced with fully direct food contact approved grades of PP in manufacturing facilities fully hygiene accredited to grade A level BRC/IOP.

Specialist Containers
Injection Moulded, PP

Standard Containers are injection moulded in PP and have a clip on lid. They do not have a tamper evident rim and so are sometimes preferred where easy closing and lid removal is important.

Nearly all the packs listed are held as stock items in either natural or transparent PP by the manufacturer. Customisation is available with colouring of the PP and with branding via In Mould Labelling (IML) or dry offset printing as indicated in the brochure. These are subject to minimum order sizes.

This range includes the popular measuring cup range with dry offset printed measurements and also the SP range which give a liquid tight lid fit and is used for chilled soup.

All packs are produced with fully direct food contact approved grades of PP in manufacturing facilities fully hygiene accredited to grade A level BRC/IOP.

Circo™

Circo is an advanced new concept at the forefront of recyclability.

Paperboard outer, for 'take-away' aesthetics with an easily separated, lightweight plastic liner for 'retail performance'.

Fully recyclable, Circo tubs and trays: minimise plastic use, are film sealable, liquid proof, and in sizes where a PP liner is available, microwavable.
